

MID-SOUTH LSV

About Us:

Manufactured in Cleveland, Tennessee Mid-South LSV offers the quality of an American made vehicle at a reduced rate. This is made possible by using 30% of remanufactured parts. Your brand new Luxury model from Mid-South LSV also offers a unique AutoBrake system featuring two revolutionary technologies: a motor brake that slows the vehicle up or down steep grades, and an automatically applied parking brake. This combination provides full-time regenerative braking which captures energy and uses it to help recharge the batteries.
